

WORK FOR CLEAN WATER

Join **Master Water Stewards**

Are you concerned about keeping nearby lakes and streams clean?

The Master Water Stewards Program was created to provide training and support for community members to help solve water resource problems in partnership with local experts and agencies.

Modeled after the Master Gardener Program, Stewards will learn about environmental policy, stormwater management, hydrology, and much more. No experience required. Classes will be held every other Tuesday from 6-8 pm between January 19 and July 12, 2016. As part of this program, Stewards will work together to identify and complete a project to reduce water pollution. Ongoing education and volunteering required to maintain certification.

Please join us in the Oak Room at Roseville City Hall on October 27, 2015 from 6:30-7:30 pm to learn more about this exciting opportunity.

Send questions or RSVP to Jessica Bromelkamp at jbromelkamp@ricecreek.org or 763-398-3073.

Master Water Stewards is presented by Freshwater Society and sponsored by the Rice Creek Watershed District.
